

# LA PATUM

Please note that the lyrics below are for the teacher's reference only. Tell the students to listen to the song and write the correct number next to the corresponding image each time the music stops. Alternatively, they can cut out the images and hold up the correct image when the music stops. If the students find it easy, play the song again and ask them to hold up the correct image as they identify the words in the song. If there is time at the end, the children can play matching pairs using the images.
